**Ladies and Gentlemen,**

Following the success of the 12 conferences held in past years in Kraków we are pleased to invite you for:

## **13<sup>th</sup> School of Modal Analysis**

**Kraków, 4-5 December 2008**

### General Information

This is already 13 time we organize this conference.

We will take all pains to do it on the best way.

The 13<sup>th</sup> School of Modal Analysis will take place at the Cracow University of Science and Technology (AGH). The accepted papers will be presented in sessions.

### Cracow

Cracow is a magical city. Modernity, and history present in legends, traditions, and the city itself blend to yield its unique and unforgettable aura. The city is home to the Wawel Castle the abode, and coronation hall of Polish kings, the Marian Church, with a gothic altar chiseled by Wit Stwosz, and Europe's largest town square. There is also the Jagiellonian University the oldest academic institution in Poland with its world famous Collegium Maius.

**For those who will be interested in seeing the old city we will organize an exiting social program.**

### Conference Topics

The conference aims to illustrate current progress trends, and allow for the presentation of achievements in the following fields:

-  new methods of theoretical and experimental modal analysis,
-  identification of models of dynamic systems (linear and nonlinear),
-  model updating and validation,
-  application of model analysis in monitoring, diagnostics, structural modification
-  new measurements techniques in modal analysis.

As usually after every session we plan a discussion.
