Latin American Journal of Solids and Structures

São Paulo, 28 March 2008

Dear Prof. Jan Awrejcewicz,

The **Latin American Journal of Solids and Structures** is now on its fifth volume and it is indexed in the important data basis ISI Web of Science.

As you know, the journal covers many distinct subjects and authors from many countries have already published on it. All this is due to the necessary cooperation of the journal's editorial board.

Due to your constant commitment to LAJSS and as an **International Advisory Member**, we would like you to help us further in maintaining and improving the journal quality by:

- Monitoring the editorial policy of the journal, both in terms of its coverage and the quality of papers, conveying your views to the editors.
- Encouraging your colleagues to submit manuscripts to the journal.
- Improving the journal visibility by redistributing (quarterly) the CONTENTS to your email list.
- Supporting LAJSS through **submission of your own manuscripts**.

We hope you bear in mind the name of LAJSS as a publication media for your research.

We are looking forward to working further with you in maintaining and improving the reputation LAJSS has been conquering along the years.

Yours sincerely,

Marcilio Alves
Editor LAJSS
