“Numerical modeling of human pelvic bone using finite element method”

Master of Science Diploma Thesis

Supervised by Professor Jan Awrejcewicz

Department of Automatics and Biomechanics

ŁÓDŹ 2010

I. INTRODUCTION

TABLE OF CONTENTS:

I. INTRODUCTION.....	3
II. ANATOMY OF PELVIC BONE	4
II.1 The principle of construction of the pelvis.....	5
II.2 Sex differences of pelvis.....	9
III. MECHANICAL PROPERTIES OF BONE TISSUE.....	11
IV. COMPUTED TOMOGRAPHY	15
V. FINITE ELEMENT METHOD	17
VI. CREATION OF FEM MODEL.....	19
VII. BOUNDARY CONDITIONS.....	23
VIII. RESULTS FOR BASIC MOTIONS	40
IX. RESULTS FOR NON-FIZIOLOGICAL CASE.....	42
X. SUMMARY	46
XI. REFERENCES	47
