

**TECHNICAL UNIVERSITY OF ŁÓDŹ**

**FACULTY OF MECHANICAL ENGINEERING**

**&**

**INTERNATIONAL FACULTY OF ENGINEERING**

**Joanna Janik**

**Mechanical Engineering with Applied Computer Science**

**Index Number : 103949**

**„Impact Analysis of the Human Skull”**

**Master of Science Diploma Thesis**

**Supervised by Professor Jan Awrejcewicz**

**Department of Automatics and Biomechanics**

**ŁÓDŹ 2004**

## Table of Contents

I. Introduction .....	3
II. Background.....	4
II.1. Human Skull Anatomy .....	4
II.2. Bone Structure .....	6
II.3. Composition and Mechanical Properties of Bone .....	8
II.4. Finite Element Method.....	9
II.5. ANSYS.....	12
II.6. SHELL 63 Element Type .....	14
II.7. Impact Analysis .....	15
III. Methodology .....	17
III.1 FEM Model Creation .....	17
III.2 Boundary Conditions.....	21
IV. Results.....	26
IV.1 Deflection .....	26
IV.2 Elemental versus Nodal Solutions.....	28
IV.3 Principal Stresses .....	30
IV.4 Equivalent Stresses .....	33
V. Concluding Remarks .....	37
References .....	38
